Work Experience

Software Test Automation Engineer (Remote), **Intertech**

Oct 2023 - Present

Develop and automate test cases for the bank's applications and infrastructure as part of a microservice transformation. Working with the securities team in an agile environment, I ensure software quality by writing automation code, running regressions, and identifying issues early.

Frontend Developer (Remote), **OgrenciBaksana.com**

May 2023 - Oct 2023

Built and maintained responsive pages, optimizing user experience, and implementing design changes under guidance.

Business Development Executive (On-site), **Yollando.com**

May 2022 - Dec 2022

Contributed to a digital platform enabling international shopping and shipping from Turkey. This experience sparked my interest in web development and led me to pursue a full-stack development career.

Business Development Specialist (Remote), **Demioren Technology**

Sep 2021 - May 2022

Pivoted to digital products, conducting research, reporting, and tracking KPIs for the parent company and subsidiaries.

Export Specialist (On-site), **Lila Group**

Feb 2020 - Sep 2021

Managed key accounts in Israel and Palestine, launching new brands and products, coordinating pricing, and collaborating on production and marketing plans. Worked with clients across Asia, the Middle East, and the Americas.

Export Specialist (On-site), **Vivatinell**

Nov 2018 - Feb 2020

Supported daily operations, attended client meetings in Europe, and led corporate/brand website development.
